

Pallet storage, warehouse storage

Short description:

Store your pallets high in warehouses in total security!

The extent of products in the PROPAL + range of pallet shelving provides storage for all loads up to 5600 Kg per storage level. Save space and increase the storage zone in your warehouse!

Description:

frames can take up to 20 tonnes of pallets with a first level at 1400 mm off the floor. Designed and tested according to the standard FEM 10.2.02

2 possibilities for setting up your storage:

- simple pallet racking: generally placed against the walls
- double depth: made up of 2 units back to back and linked by spacer bars. Access to both sides.

Advantages:

- Adaptable : Levels adjustable every 75 mm.
- Reliable: Excellent distribution of effort obtained by the concept of the hook that wraps around the upright at a height of 275 mm.
- Robust: The upright is cold rolled and has 10 bends providing great resistance to buckling.

Technical characteristics: 10 Depths: from 600 mm to 1500 mm (from 100 to 100 mm). 22 Heights: from 1800 mm to 8100 mm (from 300 to 300 mm). 15 Lengths from 1500 to 3900 mm.
