

Stocker - presentation and storage solution

Short description:

The stocker by PROVOST provides a practical solution for the presentation and storage of small spare parts for the shop, workshop and workstation. This modular solution is offered in a mural version, single or double sided or mobile. This system can be supplied with notched panels to take plastic bins, single or double hooks or hooks for blister packs to display your products. PROVOST stockers can also accept hanging rails, arms (rack version), shelves (in horizontal or tilted positions) and supports for bins with spouts.

Description:

To choose your modular stocker solution, decide on your structure (single side, double side, mobile or wall mount). Choose the accessories you need (tubular or sheet metal shelves, bin supports, hanging rails, etc.) Decide how many elements you need : a starter element and as many add-on elements as you need (add-on elements may only be attached to starter elements).
