

Panel carrier trolley with double sides

Short description:

Panel carrier trolley with double sides- Protection for plates and panels thanks to the wooden covers on uprights and baseplates. No contact with the metal structure possible. Easy to control with the two lateral handles. Uprights and baseplates tilted at 5° for better stability of the materials transported. Takes all formats of plates and panels. 2 fixed casters + 2 swivelling casters with brakes in conformity with the European Standard EN 1757-3 (Handling trolley security). Wheels Ø 200 mm with rubber tyres.

Finish epoxy blue RAL 5019.
Supplied as flat pack with assembly instructions.
