

## Industrial workbench with lower level

### Short description:

A complete and modular range of workbenches. Robust units built to last. A Provost workbench each application: mechanics, electronics, metrology, electrotechnology, pharmaceutical assembly, maintenance.

- Unit made of heavy steel sheet.
- Collapsible rigid structure with 2 beams under the top.
- Legs have plastic end caps for floor protection.
- Stationary structure + top.

Available in two sizes and two different materials:

Top beech plywood: 40 mm thick. Flexural and impact strength.

Stratified top Polyrey HPL: Colour light grey, 37 mm thick. Resistant to dry heat 180°C. Hygiene and chemical resistant.

Lower level with wooded top.
