

## Prodyn flow storage

### Short description:

---

The ideal solution to speed up order fulfilment and make handling easier. This system adapts to all sectors of activity: for small, medium and large packaging

### The advantages:

- Time savings of up to 70% in order fulfilment through reduced picking trips.
- Space savings of up to 30% approximately by eliminating aisles.
- Separate loading and dispatching zones, making the pickers' task easier.

### Description:

---

- Products move down using gravity on rails with wheels thus decreasing internal handling times.
- Straight aisles mean time savings and less risk of picking error.
- A better overall view of stored goods making it easier to take them and to make flash inventories.
- Concentrated volume of stored goods.

- Stored merchandise automatically moves towards the picking side
