

Proroll 362 steering wheel mobile shelving

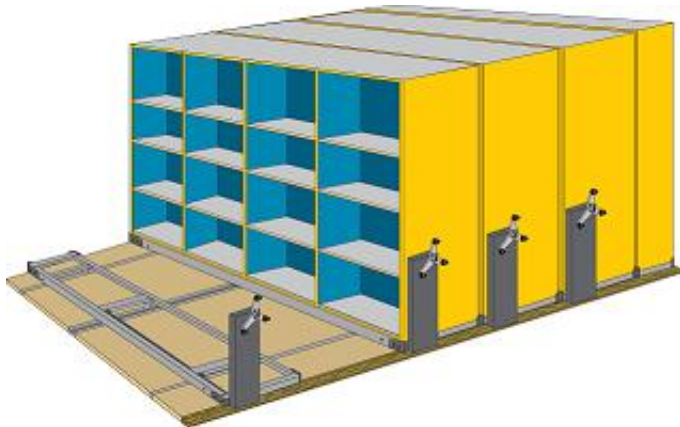

Short description:

A system designed to save up to 80% of space.

362 mm deep and in conjunction with Proclass office shelving, the compact Proroll shelving becomes a very efficient system for compressing archives: boxes or hanging files.

Compact shelving system made up of carts that travel on rails with manually or using a motorised system. The carts travel on tracks from which they cannot derail, and which are inlaid in a level floor. Complete security by steering wheel lock.

Description:

Save space: With PROROLL mobile shelving, it is the aisles that move, not people. A single aisle is sufficient. Storage volume is multiplied by 1.8.

Make the most of space: the mobile archiving system provides better space management

Save time: Easier access means faster searches for goods or documents
